The Future Of Advanced Computing
How can it be used?
• A convergence of the biological, the physical, and the digital combining these advancing capabilities into a dynamic, rapid eco-system:
• quantum nano-computing, IoT, Robotics, 3D-printing, autonomous vehicles, Narrow Artificial Intelligence (ANI), General Artificial Intelligence (GAI)
• Changes:
• computers inside a pill curing illness
• prosthetics and devices directly interfacing with the brain and the brain informing the device what to do
• transplant organs printed on a 3-D printer
• ads that understand and adjust to emotions on the fly
• networks that protect identities and information using nano technologies
